

BILL 30 POISONS LABOUR RELATIONS

The Charest government's Bill 30 is a direct attack on our working conditions and union rights. It has two purposes:

- to divide workers by breaking down unions into four classes of personnel;
- to drive down unionized employees' working conditions by decentralizing 26 matters in the collective agreement and imposing unacceptable restrictions on local bargaining.

**Local
contracts ?
No way!**

Reject this decentralization! Resist it actively:

- by boycotting local bargaining;
- by taking a public stand against the decentralization of collective bargaining and by participating in union activities.
